

Quality Policy

The continuing Policy of QuickCircuit is to provide a high quality, professional and efficient service to ensure the satisfaction of all of the requirements of our clients. This achievement will result in securing efficiency, a strong customer focus and enhancement of long-term sustainability and profitability within the Organisation.

To maintain quality performance of all business activities at the highest level, the following aims are pursued:

- The Management Team will show leadership and commitment, and bear the responsibility for establishing, implementing, integrating, maintaining and continually improving the Quality Management System. We undertake to ensure sufficient resources are made available within the Organisation to achieve this.
- The Quality System will be monitored, measured, evaluated and enhanced regularly under the Top Management's ultimate responsibility, with regular reporting and communication of the status and effectiveness at all levels.
- We will maintain a 'risk based' and integrated management system that meets the requirements of ISO 9001:2015; ISO 14001:2015 and AS9100D. The Quality Management System will be developed in the context of the organization and will ensure alignment to the strategic business direction.
- The Organisation has a Policy of promoting continual improvement and setting of Quality Objectives at relevant functions, levels and processes needed for the Quality Management System. These objectives will address the risks and opportunities within the Organisation as determined by Top Management.
- We undertake to ensure through communication, engagement, practical example and training that Quality is the aim of all members of the Organisation. Through direction and support, each employee will have a proper understanding of the importance of the Quality System function, their responsibility to contribute to its effectiveness, and its direct relevance to the success of the Organisation. Equally, every employee is responsible for, and will be trained to perform the duties required by his or her specific role.

Our commitment is simple: combine great people, high-end equipment and production systems to deliver the best solutions for electronic assemblies.

Warren Yee
Managing Director
